

## **US film Nuclear Savage wins Rio de Janeiro's Yellow Oscar**

**The feature documentary "NUCLEAR SAVAGE: The Islands of Secret Project 4.1" by US-Filmmaker Adam Jonas Horowitz is a brilliant accusation against a terrible crime, done by the Government of the USA. Atmospheric testing of atomic bombs and using local populations as guinea pigs are crimes against humanity. Nuclear Savage is a must-see documentary for everybody, no matter if you are in favour of nuclear power or against. For that "Nuclear Savage" won the Yellow Oscar of Rio de Janeiro's 3rd International Uranium Film Festival 2013. "Adam Jonas Horowitz shot his first film in the Marshall Islands in 1986, and was shocked by what he found there, in this former American military colony in middle of the Pacific Ocean. Radioactive coconuts, leaking nuclear waste repositories and densely populated slums were all the direct result of 67 Cold War U.S. nuclear bomb tests that vaporized islands and devastated entire populations."**
